

Sirius ReportMaker™

Making student assessment
and report writing an
efficient and highly
professional facility for
Australian primary and
secondary schools.

Report Writing And Assessment Made Easy

ReportMaker™ is an easy-to-use but very powerful assessment and reporting tool suited to both primary and secondary schools.

It is fully customisable to school-defined formats including marking schemes and student groupings.

ReportMaker™ provides a streamlined, efficient and time-saving reporting method for teachers, a seamlessly integrated system for the school and an impressive reporting output for parents. Analysis of results enables the school to ensure consistency of marking, highlights areas where student follow up would be advisable and helps shape curriculum.

How ReportMaker™ Works

ReportMaker™ has been developed in Australia especially to meet the needs of Australian schools.

The system provides teachers with a fast and easy method for recording student results, comments and performance details either daily or weekly. These results are then simply transferred to the final student reports, making the whole process of report writing fast, efficient and professional.

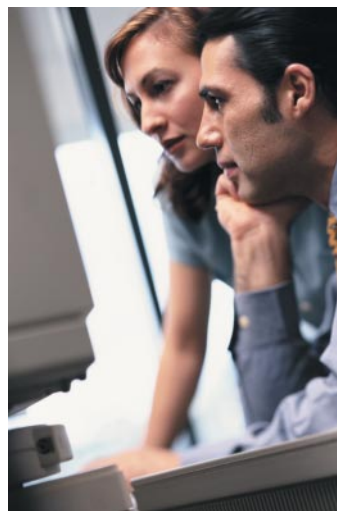

Central administration ensures all records are stored together and that reports are consistent with the school's formatting procedures.

The addition of extra modules can provide sophisticated analysis of report records, track attendance, schedule parent/teacher interviews and manage the music programme.

Teachers can work off-line, enabling reporting to be completed at home if necessary.

So Many Features And Benefits

- Easy to use - WSIWYG
- Customised report templates installed for you
- All templates are modifiable to suit changing needs
- Use on networks, laptops and desktop computers
- Extensive automated backup and restore functions
- Drop down lists, bar graphs & ticks for fast entry of results
- Powerful Find and Replace for fast comment editing
- Teacher updates of student and subject details
- View previous results (eg CSF results) as you work
- Reports transfer between network and home computers
- Input daily or weekly assessment results and comments throughout the semester
- Use List Views for fast entry of results
- Preset comments save hours of time
- Copy results to the entire class
- Full Spell Check

Scalable To Suit Any Size School

ReportMaker™ offers the levels of security and sophistication necessary in larger educational institutions while remaining accessible to smaller schools with limited technology resources. ReportMaker™ is ideal for:

- Secondary schools
- Primary schools
- Independent schools

Outstanding Support

Our 'hands on' support programme guarantees you will never be left alone to sort out any problems. Our staff are only too happy to personally install ReportMaker™ and train staff. We also provide excellent email and telephone support whenever it is needed.

Easy To Administer

The hub of ReportMaker™ is the administration module where all report data is stored, coordinated and distributed.

The two-way customisation process means that ReportMaker™ is tailored to meet each school's specific requirements before installation. Minimal staff training is required - teachers can use ReportMaker™ immediately.

ReportMaker™ automatically updates, ensuring teaching staff are always up to date with changes to student and subject details.

ReportMaker™ will transfer student, teacher, subject or enrolment details from school administration and time tabling packages.

Highly valuable as an analysis tool, ReportMaker™ archives all data so that student results and reports can be tracked and analysed over the school years. Data can also be exported to Microsoft Excel for graphical/statistical analysis.

Because authorisation of the central database is assigned only to the appointed administrator/s, all data is well protected.

Sirius ReportMaker™

CENTRAL ADMINISTRATION

- Transfers class lists from timetable systems
- Dynamically creates any class lists not accessed from the timetable system
- Automatically updates student/subject data
- Customised report templates are fully integrated into to the software (without requiring 3rd party software for printing)
- Templates may include use of graphical elements
- Easily creates new/modified templates
- Collates and prints student reports/cover pages
- Prints achievement/effort certificates
- Prints summaries of student results for coordinators
- Archives/retrieves/tracks all data with templates in-built
- Exports data (including XML) to other applications, eg Excel

TEACHERS

- Record daily/weekly student assessments and comments
- Personalised comment library for expedient report writing
- View past CSF results while working on current reports
- Calculate weighted average marks
- Record student attendance
- Work at home or at school on a portable or desktop computer
- View actual reports on-screen
- Multiple backups of data ensure valuable reports are protected

PARENTS

- Reports can be issued in consistent, high quality formats
- Graphical elements can simplify the display of results, CSF strands
- Reports can be sent to parent via encrypted email
- Ongoing student assessment results and attendance can be regularly accessed via secure log-in to the school's website
- Cover pages can automatically list reports enclosed

Powerful For Teachers

Teachers can begin using ReportMaker™ immediately, with minimal training. It is extremely intuitive and designed to encourage daily use so that report making and assessment are never a chore.

ReportMaker™ gives teachers a great deal of flexibility and will cut report making time dramatically. Daily or weekly assessments and comments are transferred automatically to final reports and can be edited as desired. By drawing from their personalised comment library, teachers can find appropriate comments easily and quickly.

Viewing previous results while working on current reports also makes report writing fast and consistent. Assessments become easier when weighted average marks can be calculated quickly.

Impressive For Parents

Today's busy parents rely on quality reports to keep well informed. Reports can be issued as single or multi-page documents in a variety of formats over any period of time. They can be provided as a printed report, emailed as encrypted attachments or made available through the school's web site with a parent access code to ensure confidentiality.

Optional Modules

ReportMaker™ can be extended at anytime by adding **StudentManager™** so that recording of student behaviour, work non-submissions, attendance, assessment & reporting results, student staff timetables and contact details can be fully integrated.

The following modules can also be added at any time:

RollMarker™

A stand-alone module (or integrate with ReportMaker™) to maintain accurate records of student attendance and provide detailed summary reports for school administration.

ResultsAnalyser™

Automatically graph student results by subject, class, gender and teacher for easy analysis of curriculum outcomes.

InterviewTracker™

Automates invitation letters, interview schedules and confirmation letters for parent/teacher interview sessions.

MusicManager™

Manages lesson/ensemble enrolments, sales, instrument hire, staff payments, music camps – can export payment details to most central school administration software.

ENGLISH 9

1 Rose may need to apply herself more consistently in her approach to her writing skills if she is to achieve better results.

2 Rose displayed a high level of understanding and her writing was basically sound with an effective vocabulary and a good command of basic skills.

3 Rose's written expression was fluent, creative and showed a mastery of basic skills.

4 Rose had some basic problems with expression, sentence structure and paragraphing. She must give more attention to her written expression.

5 Rose presented some excellent creative work and has shown the ability to write clearly in an organised and capable fashion.

6 Rose often had good ideas which she expressed poorly. As a result, her work was often disjointed and lacking in fluency.

7 Rose must take care to proofread her final draft before submission.

"Whilst providing underlying staff professional development in information technology, ReportMaker™ has facilitated the enhancement of supportive learning teams - everyone has learned together in buddy groups. It has streamlined our reporting system by removing the drudgery from report writing and is now a professional task that staff work happily on. From a principal's perspective it has made my work much easier as the end documents which I proof read are near perfect. Parents are also impressed."

Jenny Roth, Principal
 Derinya Primary School

"ReportMaker™ has effectively catered for the needs of this large split-site Secondary College which offers almost 300 Units of Study. The ability to individualise the multiple report formats required to suit the needs of the College together with massive time savings and the ability to summarise student results for coordinators, have ensured that the conversion to ReportMaker™ has been most beneficial."
